About KRQA Certification

We Build Trust, Expand Horizons & Foster Connections.

KRQA., we pride ourselves not only on certifying organizations but also on fostering a culture of continuous improvement with our training programs like Internal Auditor, Lead Auditor, Workplace Management System etc. Our journey has been marked by a commitment to quality & reliability.

KRQA, in collaboration with SQC Certification Services, has been accredited by the UAF Accreditation Board for ISO/IEC 17021-1:2015, covering the Quality Management System (ISO 9001:2015), Environmental Management System (ISO 14001:2015), Occupational Health and Safety Management System (ISO 45001:2018), and Information Security Management System (ISO/IEC 27001:2022).

We are currently in the process of obtaining accreditation from KAN Indonesia and SAC Singapore, as well as pursuing accreditation related to ISO/IEC 17065.

KRQA Mission

To empower organizations worldwide by delivering excellent ISO certification and training services, fostering a culture of excellence, sustainability, and continuous improvement. We are committed to providing cost-effective, high-quality solutions that demonstrate our dedication to delivering value to our clients. Recognizing that cost is a critical consideration for many organizations, we strive to offer exceptional services at competitive and affordable prices.

KRQA Vision

To be a global benchmark of excellence, KRQA Certification aims to lead the certification industry through continuous innovation, shaping a future where organizations flourish with quality, integrity, and sustainable practices. Our vision is to become the most trusted and reliable service provider in the nation, delivering exceptional value without compromising on quality. We believe that continuous improvement in quality management systems is essential for achieving organizational excellence and earning long-term customer confidence.

KRQA & SQC Accreditation

In partnership with SQC, we proud to hold accreditation from the United Accreditation Foundation (UAF), enabling us to deliver ISO certification services across a broad spectrum of internationally recognized standards. Our accredited scope includes ISO 9001 Quality Management Systems (QMS), ISO 14001 Environmental Management Systems (EMS), ISO/IEC 27001 Information Security Management Systems (ISMS), ISO 45001 Occupational Health and Safety Management Systems (OHSMS), as well as additional globally recognized frameworks such as ISO 20000, ISO 50001, ISCC-EU, ISCC-PLUS, ISCC-CORSIA, and FSSC 22000. UAF accreditation represents a globally respected mark of quality and reliability. It confirms that a certification body operates in full compliance with international requirements and demonstrates competence, impartiality, and transparency. Certifications issued under UAF accreditation are trusted worldwide, enabling organizations to strengthen their credibility and meet global compliance expectations. KRQA is currently in the process of obtaining additional accreditations from KAN Indonesia and SAC Singapore.

KRQA TRAINING PROGRAM

KRQA offers professional training programs designed to strengthen organizational competence in understanding, implementing, and managing international standards. All KRQA training sessions are facilitated by world-class instructors with extensive experience in auditing, global standardization, and organizational capacity development.

As part of our commitment to delivering the highest quality training, KRQA collaborates with MsSkilled Sydney, Australia—an internationally recognized training institution specializing in professional competency development, service quality enhancement, and technical capability building for organizations worldwide.

Our comprehensive training portfolio includes:

- **Lead Auditor Training**
- **Internal Auditor Training**
- **Awareness Training**

KRQA LEAD AUDITOR TRAINING

KRQA delivers comprehensive Lead Auditor Training programs designed to strengthen auditing competence and professional expertise. Our courses equip participants with the skills required to perform effective audits in accordance with international standards, supporting organizational compliance and fostering continuous improvement. With a strong presence across the Asia-Pacific region, KRQA has successfully delivered Lead Auditor Training in Indonesia, Malaysia, the Philippines, Vietnam, South Korea, Singapore and several other countries. Led by highly experienced trainers and delivered through a practical, industry-focused approach, our programs help professionals build the confidence and capability needed to excel in auditing and certification environments.

KRQA INTERNAL AUDITOR TRAINING

KRQA offers Internal Auditor Training programs designed to develop the essential skills required for effective auditing of management systems. Our training provides participants with a strong understanding of auditing principles, methodologies, and compliance requirements aligned with international standards. All programs are facilitated by internationally experienced tutors, including senior instructors who hold doctoral degrees with research focused on certification bodies. Their global industry exposure and academic expertise ensure that participants receive high-quality, relevant, and insightful learning experiences. Through expert-led sessions and practical learning approaches, participants gain the competence needed to enhance organizational performance, strengthen internal controls, and support continuous improvement initiatives.

KRQA AWARENESS TRAINING

KRQA, offers comprehensive Awareness Training programs designed to help organizations understand ISO standards and key compliance requirements. Our expert-led sessions equip employees with the foundational knowledge needed to support effective implementation and ensure adherence to international management system standards.

OUR SERVICE

KRQA offers Internal Auditor Training programs designed to develop the essential skills required for effective auditing of management systems. Our training provides participants with a strong understanding of auditing principles, methodologies, and compliance requirements aligned with international standards. All programs are facilitated by internationally experienced tutors, including senior instructors who hold doctoral degrees with research focused on certification bodies. Their global industry exposure and academic expertise ensure that participants receive high-quality, relevant, and insightful learning experiences. Through expert-led sessions and practical learning approaches, participants gain the competence needed to enhance organizational performance, strengthen internal controls, and support continuous improvement initiatives.

ISO 9001 – Quality Management System

ISO 9001 is an international standard for Quality Management Systems (QMS) designed to ensure that organizations consistently deliver products and services that meet customer requirements and comply with regulatory obligations. It emphasizes continuous improvement, effective process control, operational efficiency, and customer satisfaction. ISO 9001 applies to all types of organizations large or small, profit or non-profit, across all industries.

ISO 14001 – Environmental Management System

ISO 14001 is an international standard for Environmental Management Systems (EMS) designed to help organizations manage their environmental responsibilities in a systematic, effective, and sustainable manner. It provides a framework for reducing environmental impacts, ensuring regulatory compliance, optimizing resource use, and supporting long-term environmental stewardship. ISO 14001 is applicable to all types of organizations—large or small, profit or non-profit, across all sectors and industries.

ISO 45001 – Occupational Health and Safety Management System

ISO 45001 is an international standard for Occupational Health and Safety Management Systems (OHSMS) designed to help organizations create safer workplaces, prevent work-related injuries and ill-health, and proactively improve overall occupational health and safety performance. It provides a structured framework for identifying hazards, assessing risks, implementing controls, ensuring legal compliance, and promoting a culture of safety across all organizational levels. ISO 45001 applies to all types of organizations—large or small, profit or non-profit, across all industries including construction, manufacturing, aviation, oil & gas, healthcare, services, and public institutions.

ISO 27001 – Information Security Management System

ISO 27001 is an international standard for Information Security Management Systems (ISMS) designed to help organizations protect information assets through a systematic approach to managing security risks. It provides a structured framework for safeguarding confidentiality, integrity, and availability of information, reducing cybersecurity threats, ensuring regulatory compliance, and building trust with stakeholders. ISO 27001 applies to all types of organizations large or small, profit or non-profit—across all industries that manage sensitive information, including finance, telecommunications, healthcare, government, education, aviation, manufacturing, energy, and digital service providers.

ISO 22301 -Business Continuaty

ISO 22301 is an international standard for Business Continuity Management Systems (BCMS) designed to help organizations prepare for, respond to, and recover from disruptive incidents. It ensures business operations can continue during crises such as natural disasters, cyberattacks, system failures, or supply chain disruptions. The standard focuses on protecting critical processes, minimizing downtime, and maintaining customer trust during unexpected events. ISO 22301 applies to organizations of all sizes and sectors.

ISO 42001 Artificial Intelligence Management System

ISO/IEC 42001 is an international standard that specifies requirements for establishing, implementing, maintaining, and continually improving an Artificial Intelligence Management System (AIMS) within organizations. It is designed for entities providing or utilizing AI-based product or services, ensuring responsible development and use of AI systems

MLC 2006 - Maritime Labour Convention

The Maritime Labour Convention, 2006 (MLC, 2006) is an international labour convention developed by the International Labour Organization (ILO) to protect the fundamental rights, working conditions, living conditions, health, safety, and welfare of seafarers worldwide. Often referred to as the "Seafarers' Bill of Rights," the Convention establishes comprehensive minimum requirements for decent work on board ships.

ISO 37001 – Anti-Bribery Management System

ISO 37001 is an international standard for Anti-Bribery Management Systems (ABMS) designed to help organizations prevent, detect and respond to bribery in all its forms. It provides a structured framework for implementing anti-bribery policies, establishing effective controls, promoting ethical behavior, ensuring regulatory compliance, and protecting the organization from legal, financial, and reputational risks. ISO 37001 applies to all types of organizations—large or small, profit or non-profit across all industries that face bribery risks, including government institutions, construction, oil & gas, finance, healthcare, procurement, education, retail, transportation and service industries.

ISO 20000 – IT Service Management System

ISO 20000 is an international standard for IT Service Management Systems (ITSMS) designed to help organizations deliver reliable, high-quality, and customer-focused IT services. It provides a structured framework for planning, delivering, monitoring, and improving IT services to ensure performance consistency, service availability, incident reduction, and customer satisfaction. ISO 20000 applies to all types of organizations large or small, profit or non-profit, across all industries that rely on IT services, including banking, telecommunications, aviation, manufacturing, healthcare, government, and managed service providers (MSPs).

ISO 50001 – Energy Management System

ISO 50001 is an international standard for Energy Management Systems (EnMS) designed to help organizations improve energy performance systematically, reduce energy consumption, and optimize energy efficiency in daily operations. It provides a structured framework for managing energy use, improving energy-related processes, reducing costs, ensuring regulatory compliance, and supporting long-term sustainability goals. ISO 50001 applies to all types of organizations—large or small, profit or non-profit—across all sectors including manufacturing, buildings, transportation, utilities, mining, oil & gas, data centers and public institutions.

ISCC – International Sustainability & Carbon Certification System

ISCC (International Sustainability & Carbon Certification) is a globally recognized certification system designed to ensure sustainability, traceability, and greenhouse gas (GHG) emission reductions across supply chains. ISCC provides a structured framework for verifying that raw materials and products biofuels, biomass, waste & residues, food, feed, chemicals, plastics and renewable materials—are produced responsibly, ethically and in compliance with international sustainability requirements. ISCC certification applies to all types of organizations across global supply chains, including agriculture, plantations, traders, biofuel producers, chemical plants, refineries, logistics operators, manufacturers and brand owners.

ISCC PLUS – Global Sustainability Certification for All Sectors

ISCC PLUS is a voluntary sustainability certification system used worldwide across various industries including food, feed, chemicals, plastics, packaging, agriculture, and bio-based products. It focuses on promoting circular economy principles, responsible sourcing and sustainable supply chains.

ISCC CORSIA – Aviation Fuel Sustainability Certification

ISCC CORSIA is specifically designed for the aviation sector under the International Civil Aviation Organization (ICAO) program called CORSIA (Carbon Offsetting and Reduction Scheme for International Aviation). It ensures that Sustainable Aviation Fuel (SAF) producers meet stringent sustainability and greenhouse gas criteria required for airlines to reduce carbon emissions.

FSSC 22000 – Food Safety Management System

FSSC 22000 (Food Safety System Certification) is one of the world's most recognized food safety certification schemes, designed to help organizations ensure comprehensive food safety, prevent contamination, meet regulatory requirements, and build trust across the global food supply chain. This scheme combines ISO 22000, Prerequisite Program (PRP) standards such as ISO/TS 22002-1, and additional FSSC requirements to create a complete, comprehensive, and reliable Food Safety Management System. FSSC 22000 applies to all organizations within the food supply chain — food and beverage manufacturers, packaging, feed producers, transport, distribution, catering, specific retail operations and other supporting entities.
